

CDM SMITH & UTILITYAR

CDM Smith Provides International Expertise Using UtilityAR

CDM SMITH REPORTS SAVINGS OF 10-20%

CDM Smith is a full service engineering and construction firm that provides consulting, design, and program and integrated construction management solutions in water, environment, infrastructure, energy and facilities projects for government and private clients. With over 5000 staff, they have offices throughout the world including Ireland and the UK.

CDM Smith was looking for solutions that would enable them to improve their ability to bring their international expertise to regional projects, without the need for those experts to travel on every occasion.

AUGMENTED REALITY SMART GLASSES

UtilityAR Smart Glasses are a new platform that presents exciting opportunities to provide workers with the information they need to get their job done and to link them with specialist staff and advice when needed.

Augmented Reality smart glasses can project information onto the inside of the lens of the glass to allow the wearer to see it while still seeing the real world and being hands-free.

REMOTE ADVISER VIDEO CALLING

CDM Smith used the on-board forward-facing camera to allow an offsite adviser to see what the local technician is seeing and to provide feedback to them on the next steps through the headphones and using onscreen mark-ups. UtilityAR allowed CDM Smith to save hours of travel and enabled the most qualified and experienced person to easily weigh in on a problem whenever required.

AVAILABLE ON A WIDE RANGE OF MODELS

“ UtilityAR has allowed us to provide specialist services across the world without our specialists having to travel to the site. ”

*Jon Hunt
Client Services Manager, CDM Smith.*

RESULTS

CDM Smith reports %10-20 cost savings by using UtilityAR Solutions. UtilityAR is allowing CDM Smith to offer better outcomes to their customers in the project development, energy and utility sectors. Using Augmented Reality software, the company have reduced the amount of travel required by their specialists while also improving the availability of those specialists for their regional projects. This is allowing the company to deliver savings in time and costs while improving their service.
