

CoLo Real-Time Remote Eyes and Data Centre System Resilience.

CIX DATA CENTRE & UTILITYAR

Improved Resilience Using UtilityAR

CIX are innovating to provide greater levels of security, reliability and transparency to their cloud platform customers by using UtilityAR's software. The Augmented Reality glasses-based software helps the Cork based Data Centre to train staff faster and to provide staff with guidance in the event of a utility interruption. It also allows them to offer their customers real-time remote eyes in the event that a customers infrastructure requires troubleshooting.

Critical Systems Training

CIX improved their data centre reliability by using UtilityAR's Augmented Reality driven training systems. The technology allows staff to watch training videos while at the critical equipment and so be better equipped to take action when needed.

Remote Eyes

CIX allow CoLo customers to see their equipment live through their "Remote Eyes" service. This unparalleled service means their customers have a superior service to any other CoLo providers.

AVAILABLE ON A WIDE RANGE OF MODELS

Customers are Offered Remote Eyes Service to Allow them to see their Critical Infrastructure.

CloudCIX Bastion gives the customers help in deploying, hosting, maintaining, designing and setting up the infrastructure, security, backup and disaster recovery systems they need at a fixed price.

“ UtilityAR technology enables us to deliver a resilient service so our customers have peace of mind and also it enables us to invite them into the building at critical times. ”

- Jerry Sweeney, CIX Founder.

UtilityAR is an Augmented Reality Glasses Solution provider that assists Data Centres, Manufacturers and Utilities to use the technology to improve efficiency and service. The technology is focused on ease-of-use for the technician and is also extremely easy to set up. The software can work on any Augmented Reality Glasses and therefore removes the barrier of locking into a single technology in this face paced space.
